QUALITY & SERVICE SINCE 1979

"Sunrise from 14,000 Feet"

[Here's how Glenn describes the origin of his project:](#)

"Summits are magical places. Reaching the summit of a high peak gives me the exhilarating, humbling and awe-inspiring experience of being a tiny speck on top of the world. To me, mountaineering is almost a metaphor for the human condition. It embodies in concrete form the way we reach for the sky, yet can only climb so high. In the spring of 2006, I began working on a series of images I hoped would capture these powerful emotions.

Most summit photographs I'd seen were rather boring. How could that be, I thought, when the experience of reaching the summit is so enthralling? Then I thought about *when* those photos were taken: at noon, in midsummer, when the sun is as high in the sky as it will be the entire year. Most summit photos taken at that time of day show distant, hazy peaks almost lost in the white glare of the midday sun. In an attempt to give my images an impact that matched my experience, I decided to try shooting sunrise from the summits of Colorado's 14,000-foot peaks."

~~~~~

So far Glenn has done 32 shoots on 19 peaks. Come see the images from this unique project, hear the stories behind the most exciting shots, and learn more about the art of landscape photography.

Glenn Randall has been a full-time photographer and writer specializing in the outdoors for 32 years. He has had over 1,000 photographs published, including 67 covers, and sold over 10,000 prints of his landscape images. He's also authored nine books and 200 magazine articles.
