HUMOR CORNER - PILOT ERROR??

- 1) Tower: TWA 2341, for noise abatement, turn right 45 degrees
Aircraft: Center, we are at 35,000 feet. How much noise can we make up here?
Tower: Sir, have you ever heard how much noise a 747 makes when it hits a 727?
- 2) One day the pilot of a Cherokee180 was told by the tower to hold short of the active runway while a DC-8 landed. The DC-8 landed, rolled out, turned around and taxied back past the Cherokee. Some quick-witted comedian in the DC-8 crew got on the radio and said, "What a cute little plane. Did you make it all by yourself?" The Cherokee pilot, not about to let the insult go by, came back with: "Yes, and I made it out of DC-8 parts. Another landing like yours and I'll have enough parts to make another one."
